

# BAT MATCH

MATCH THE SPECIES ON THE LEFT TO THE FACT ON THE RIGHT

Big Brown Bat

This bat camouflages as leaves fluttering in the wind by hanging from one foot

Little Brown Bat

Known to roost on bearded lichens (usnea trichodea)

Eastern Red Bat

First bat to be listed as Endangered in the US

Indiana Bat

This bat hunts with a call that is too soft and high frequency for moths to hear, making them successful predators

Evening Bat

This bat prefers to hunt aquatic insects along stream corridors

Hoary Bat

This bat is one of the slowest fliers of all bats in the US, but they do have high maneuverability

Northern Long Eared Bat

This bat is one of our country's most beneficial animals according to the agricultural industry

Tricolor Bat

This bat has been recorded making short, quiet, "micro calls," and sometimes they even fly without using echolocation

Silver Haired Bat

This migratory bat builds up fat storage for its long journey south - some going as far as southern Mexico

**Big Brown Bat** *Eptesicus fuscus*  
one of our country's most beneficial animals  
according to the agricultural industry

**Little Brown Bat** *Myotis lucifugus*  
prefers to hunt aquatic insects along  
stream corridors

**Eastern Red Bat** *Lasiurus borealis*  
camouflages as leaves fluttering in the  
wind by hanging from one foot

**Indiana Bat** *Myotis sodalis*  
first to be listed as Endangered in the US

**Evening Bat** *Nycticeius humeralis*  
builds up fat storage for its long journey south – some  
going as far as southern Mexico

**Hoary Bat** *Lasiurus cinereus*  
has been recorded making short, quiet, “micro calls,” and  
sometimes they even fly without using echolocation

**Northern Long Eared Bat** *Myotis septentrionalis*  
hunts with a call that is too soft and high frequency for moths to  
hear, making them successful predators

**Tricolor Bat** *Perimyotis subflavus*  
Known to roost on bearded lichens  
(usnea trichodea)

**Silver Haired Bat** *Lasionycteris noctivigans*  
one of the slowest fliers of all bats in the US, but they do  
have high maneuverability
